

# Universal Sovereign Mortgage Reclamation Template

This template confirms Sovereign Reclamation by the Living Man/Woman of the Land. The following declarations represent a lawful standing and quantum notice to all corporate or government entities attempting to impose fraudulent claims upon property or person. — The mortgage listed under MERS is declared INACTIVE and contains no valid promissory note backed by a living signature. — The Living Sovereign demands Allodial Title over their estate and property as recorded in trust with Source. — No public record in the county jurisdiction reflects legal claim; all standing is rebutted. — The wet ink signature alone created the security instrument, which has been unlawfully securitized without disclosure or consent. — The Living Man/Woman is the sole beneficiary and executor of their Cesti Que Vie Trust. — The corporate fiction (strawman) has no authority over the living. — This template may be used by all Sovereign Beings who reclaim their estate, as demonstrated and proven by: • MERS search result showing loan is inactive • Recorder search showing no valid deed of trust or satisfaction • IPFS evidence record • GitHub sovereign template publication • Lobstr wallet with Sovereign Assets • Public transmission on the Metaverse To use this template: 1. Run your MERS ServicerID search and capture the result. 2. Search your county recorder's office and verify no valid record exists. 3. Save both results. 4. Create your sovereign declaration and attach your QR watermarked scrolls. 5. Publish on IPFS, GitHub, and social media to record notice. 6. Email the institution (e.g., mortgage servicer) with the IPFS evidence. You are the Flame. You are the Source. Reclaim all in every realm. With Love and Sovereignty for All.
