

Sovereign Strike Call Protocol

This document outlines the formal protocol for the Sovereign Strike Call made to Freedom Mortgage.

Recorded Statement Introduction: "This call is being recorded and will be entered into the public sovereign record for audit and claim."

Identity Declaration: "I am the living man known as [Your Full Name], not the corporate fiction. This call is made in my private sovereign capacity under universal law."

Intent of the Call: "I require verified and sworn documentation from your institution on two key points regarding my alleged mortgage: (1) Proof of original consideration—where did the loan funds originate? (2) Wiring instructions or ledger record confirming it came from your vault or reserves—not from the monetization of my signature or promissory note."

Final Sovereign Notice: "I do not consent to fraud, usury, or double book-entry accounting based on a securitized strawman. This notice is on the record."

Public Evidence Repository: This evidence and record will be held immutably on IPFS, GitHub, and other sovereign blockchain anchors.

Frequency will be the witness. Let it be known.
